## Spacious and Fast

**Narcosis**

- Our spacious Pro 48 was built specifically for diving.
- Powered by twin Caterpillar 3126 diesels, Narcosis cruises at a fast 28 knots. We reach our most popular sites in 30 minutes or less.
- On board amenities include snacks, cold sodas and water, fresh water showers, camera table, camera rinse basin, and weights. For your winter diving comfort those showers are hot and snacks include soups, teas, and hot chocolate.
- We offer both air and nitrox rental tanks (aluminum 80's) at the boat.
- We have an onboard Portable Emergency Marine Oxygen supply. The Captain and all crew members are certified to perform emergency CPR and/or administer oxygen if needed.

## Do It Your Way

With Narcosis Dive Charters, experienced scuba divers enjoy the freedom of drift diving in buddy pairs or small groups, carrying their own dive flag. Divers have the option of diving with experienced local divers, or with our crew dive guide, or taking a flag and having their own dive experience. To maximize your bottom time, Nitrox is strongly recommended.

## West Palm Beach Florida Dive Trips.

If bottom time is your bottom line, we're your dive boat! Tired of coming up with 1500 psi in your tank? We're your dive boat! You'll get up to a full hour of bottom time on each dive.

## The Narcosis caters to diverse interests.

As we know, not all divers are built alike! A typical Narcosis trip has a mixture of divers of all experience levels and interests. As a result divers always want to go in different directions at different speeds.

Each group has its own dive flag and dives at its own pace. The boat tracks each flag and picks up the divers as they surface. We supply a dive guide for those interested in having someone familiar with the reefs in the water with them.

## Diving West Palm Beach

The West Palm Beach Florida area offers a multitude of diving opportunities. Colorful reefs, shipwrecks, massive schools of fish, lobstering, underwater photography - it's all here, and just minutes from the dock. Whatever your scuba diving interest or experience level, we have it all. Water temps range from low to mid 80's during the summer months, and in the winter waters cool down to the low to mid 70's.

Fed by the Gulfstream's rich currents, Palm Beach County waters host an abundance and diversity of marine life that rivals anything in the Atlantic or Caribbean. Over 300 species of fish life and several thousand species of coral, sponge, and other invertebrate life are found here. Our reefs are home to huge schools of spadefish, snappers and grunts, rays, several species of turtles, including the huge loggerheads, green and spotted moray eels, spiny lobsters, and nurse sharks to name but a few. In addition to the many miles of natural reef, our wreck and artificial reef system attracts goliath grouper, barracuda and reef, lemon and bull sharks, and provides alternative habitat for juveniles of all species.

## Dive Computers and Safety Sausages.

All divers are expected to have a dive computer and a safety sausage and be knowledgeable in their use.

## Trip Schedule

Monday	Off	
Holiday Monday	10:00 am	
Tuesday	10:00 am	
Wednesday	10:00 am	
Thursday	10:00 am	
Friday	10:00 am	
Saturday-Sunday	8:00 am	1:00 pm
Night Dive	Sunset	

- Check in at least 1/2 hour prior to departure.
